Appl. No. 10/676,312 Amdt. dated June 4, 2008 Reply to Office action of April 17, 2008

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

Ŋ

1 (Previously presented). A method of modifying an image to be displayed on a display;

- (a) receiving at least a portion of said image; and
- (b) modifying said image to alternatively increase or decrease said at least one pixel's luminance output by overdriving at least one pixel of said image, for a current frame, to a current value that is selected based upon:
 - (i) at least one predicted displayed luminance value of said pixel in respective ones of at least one subsequent frame of said image;
 and
 - (ii) at least one previously displayed luminance value of said pixel in respective ones of at least one previous frame of said image.
- 2 (Previously presented). The method of claim 1 wherein said at least one previously displayed luminance value of said pixel are stored in respective frame buffers.
- 3 (Currently amended). The method of claim 2 where a first said previously displayed luminance value is at a state where liquid crystal material associated with said pixel of said display is not at an equilibrium state, and where a second said previously displayed luminance value is at a state where said liquid crystal material associated with said pixel is at an equilibrium state, and where said second said previously displayed luminance value is from the earliest sequential said at least one frame, upon which selection of said current value is based.
